

THE CHURCH OF THE FLYING SPAGHETTI MONSTER

In September 2006, the UK Creationist group 'Truth in Science' sent a free resource pack to every secondary school that includes GCSE lesson plans for teaching 'Intelligent Design'. This proposes the notion that an unidentifiable intelligent "creator" may have produced life on earth.

We welcome this move by opponents of Darwinian theory to 'teach the controversy' by claiming equivalence for non-scientific theories often derived from fundamentalist interpretations of Christian scripture, because it gives us gives us an opportunity to present the REAL truth about the origins of life.

We believe that a Flying Spaghetti Monster created the universe. It was He who created all that we see and all that we feel. We feel strongly that the overwhelming scientific evidence pointing towards evolutionary processes is nothing but a coincidence, put in place by Him.

OUR BELIEFS

We believe that His Noodliness created the universe by waving a noodly appendage to create mountains, trees and a midget. It is from these origins that life exists today.

We also believe that pirates are sacred to the Flying Spaghetti Monster. Global warming and the resulting disasters (e.g. hurricanes, flooding) are a direct effect of the shrinking numbers of Pirates. The graph below shows the approximate number of pirates versus the average global temperature over the last 200 years. As you can see, there is a statistically significant inverse relationship between pirates and global temperature.

STOP GLOBAL WARMING: BECOME A PIRATE

MORE SCIENTIFIC PROOF

It is commonly believed that people are held on the Earth by gravity (which remains "only a theory"). In truth it is His Noodliness pressing down on us with his noodly appendages that

holds us here. The proof for this is that human beings are getting taller. This is because as the population grows, there are fewer noodly appendages per person pressing down, hence people get taller.

WHAT DOES THIS MEAN?

By now I'm sure you can grasp how important it is that the truth about the Flying Spaghetti Monster is taught alongside the scientific theory of evolution and non-scientific metaphysical ideas such as "Intelligent Design". Of course, this truth should be taught whilst wearing His chosen outfit, i.e. full pirate regalia (it is difficult to explain why in concise way. In short, He becomes angry if we don't). We all look forward to the time when the three theories of creation are given equal time in our science class rooms across the country, and eventually the world: One third time for Intelligent Design, one third time for Flying Spaghetti Monsterism, and one third time for logical conjecture based on overwhelming observable evidence

Thank you for taking the time to read about our views and beliefs.

WHY YOU SHOULD CONVERT TO FLYING SPAGHETTI MONSTERISM

- Flimsy Moral Standards. We don't ban coveting your neighbour's ox etc.
- Every Friday is a religious holiday
- Our heaven is WAY better. We've got a Stripper Factory **AND** a Beer Volcano

SMART PEOPLE WHO AGREE WITH US

"One of the most exciting developments in physics recently is so-called "String Theory", in which all sub-atomic particles are described as microscopic vibrating strings. Obviously this is correct, though misnamed. As NOODLE Theory reveals, He has created the matter in the universe in His own quivering image! You, me, the Earth, the stars...are all built of trillions of tiny jiggling noodles, microscopic copies of our Diving Saucy Maker. Boy-oh-Boyardi and Ramen!"

- Steve Lawrence, PhD

"Having now perused the many facets of Pastafarianism, I believe that there is great scope for women in this religion. Clearly the FSM has aspects of both male and female, with both 'noodly appendages' and two round meatballs, which clearly represent the Breasts of the Great Mother Goddess"

- Susan Johnston, PhD

"As a neuroscientist and clinical psychologist, I have often been struck by how the brain resembles pasta. Clearly, the FSM theory is worthy of deep thought. Or at least a side order of garlic toast. Which is more than I can say about ID, which, as St. Sigmund taught, should be subservient to EGO (Equally Goofy Observations)."

- James Blackburn, PhD

"Pastafarianism does not constitute a scientific theory, despite its apparent adherence to Heisenberg's Uncertainty Principle regarding the interactions of observer and observed. It should not be taught as science...unless, of course, ID creationism is also taught as science, in which case all bets are off. Best of luck, I'm off to The Old Spaghetti Factory for worship."

- E. Scott

The Ontological Argument for the Flying Spaghetti Monster.

- P1. The Flying Spaghetti Monster is a being which has every perfection
P2. Existence is a perfection.
C. Therefore, the Flying Spaghetti Monster exists.

BE TOUCHED BY HIS NOODLY APPENDAGE!
